L I M I T E D E D I T I O N T I M E P I E C E S

Meeting new challenges in the ever evolving world of fashion and realizing visions means breaking new ground. Swisstek, a modern day horological company, presents the traditional art of petite Swiss watch makers and designers.

Vibrant elegance with subtle grace and instinctive seduction blend easily with spirited and refined touches to bring you a limited edition collection of awe inspiring styles. Swisstek limited edition timepieces are crafted with expert skill using the most attractive materials from the world of fine jewellery and horology. Each timepiece is a precious gesture of personal attachment and affection, and is embossed with its own unique identification number as an affirmation of exclusivity. Limited to one hundred pieces or less worldwide in each style, we assure you of an edge above the rest when it comes to inciting admiration and elevating status.

The collection features lavish and precious watches for everyday life.

Each exclusive timepiece in the Swisstek mark is imbued with its very own soul and epitomizes the beauty of structure and refined style.

SWISSTEK[®]

L I M I T E D E D I T I O N T I M E P I E C E S

Welcome to the exciting new world of Swisstek limited edition timepieces, a revolutionary concept that is going to shake up the traditional thinking of today's watch industry. From bold and unique designs to flawless Swiss workmanship, Swisstek limited edition timepieces are as reliable as they are distinctive. Swisstek watches are limited edition Swiss Made timepieces set with genuine precious gem stones including high grade diamonds, rare natural colored diamonds, and precious gem stones on each piece. Each watch is certified and individually numbered and produced in very low quantities to be sold through high-end jewelry stores and specialty boutique retailers located in selected cities across the globe.

Product:

Swiss Made - Each Swisstek timepiece is meticulously produced and thoroughly quality tested in Switzerland, with bold designs inspired by the latest trends across the globe.

Design - Each timepiece in the Swisstek range is carefully designed by artists and architects whose expertise span many different facets of the modern world. The timepieces are then meticulously crafted by the finest Swiss "Petite Manufacture" artisans whose skills have been handed down to them through generations of the finest watchmakers in the world.

Components - Swisstek watches are manufactured using only the finest components such as:

- The highest quality Finnish (316F) stainless steel cases and clasps
- Genuine hypo-allergenic calf, stingray (galuchat), aquatic leather, crocodile leather, and silicon straps
- High-grade tungsten scratch-resistant bezels and components
- Genuine double curved sapphire crystals and exhibition case-backs
- Push button deployment clasps
- Diamond polished blue lacquered "blued", orange lacquered, or red lacquered hands and markers
- Luminous dials, markers, and hands

Water Resistance - Swisstek watches are between 3ATM (30 meters) and 5ATM (50 meters) and are all individually tested to ensure absolute water resistance.

Diamonds and Gem Stones - Swisstek watches are set with Internally Flawless - VVS quality brilliant cut genuine diamonds, rare natural colored diamonds, and precious gem stones using the most accurate CNC and hand setting processes available today.

Complications - Swisstek watches feature the finest ETA, ISA, and Ronda Swiss complications including 25J mechanical, retrograde, dual time, alarm chronograph, and chronograph tachymetre movements.

Quality Control - Each and every Swisstek timepiece is individually screened using over 27 different quality control tests before it is available to the consumer.

Limited Edition - Swisstek timepieces are certified and individually numbered and each model is only crafted in quantities of 100 pieces or less worldwide.

Product Packaging - Each Swisstek timepiece comes individually packaged with a stunning gift box, stainless steel international warranty card, individual certificate of diamonds and limited edition, catalogue, and instruction booklet / international warranty details.

International Warranty:

24-month "buckle-to-buckle" warranty against all manufacturing defects.

Spare parts & repair service are available to all Swisstek authorized jewelers for non-manufacturing defects for the cost of the service.

The exclusive and captivating designs in the femme collection of

Serpentine

*Collection de montre
pour les hommes*”

The Swisstek homme collection is the expression of sophistication and simplicity. Solid and long lasting timepieces designed to endure the rigors of everyday life. The elegant richness of diamonds fused with the functionality of features such as chronographs, retrograde counters, alarm elements, tungsten appointments and tachymetre executions create rugged yet distinctive heirloom timepieces. The aesthetic lines of the quintessentially Swiss designs combine the elemental with the progressive. The timepieces articulate a strong and expressive character while embodying a virtuous and elegant theme.

Auto-tek

The Swisstek Auto-TEK watch has a superlative Swiss mechanical movement equipped with a self-winding mechanism. The movement of one's arm activates a small oscillating weight, which tautens the watch's mainspring. If the watch is worn regularly, it will never need hand-winding. The Auto-TEK engine itself is of pure Swiss pedigree and every part is manufactured in Switzerland. All the tolerances are exceptionally precise. The many fine-toothed wheels turn on 25 ruby-jeweled bearings and the rotor is finished in a perle and wave design. Our mechanical movements are proudly embossed with the Swisstek insignia and blue steel screws firmly anchor the bridges to the plates.

Swisstek has also equipped these fine timepieces with a sapphire crystal in the rear of the watch's case, knowing the owner will take pleasure in observing the operation of this precise mechanism.

Tungsten Alarm Chronograph

Swisstek "tungsten" blends high-TEK tungsten, which is virtually scratch and corrosion proof, with high-grade stainless steel. Tungsten Carbide is 3 times more rigid than steel and 6 times more rigid than cast iron or brass. Tungsten carbide weighs 1.5 times more than carbon steel and wears up to 100 times longer than stainless steel. Tungsten carbide is a non-corrosive material that can only be scratched, cut, or shaped with a precision diamond. Tungsten carbide's highest compressive strength is used as a heavy-metal alloy in armor piercing artillery and tank shielding for the military. Complimenting the bezel is a dome shaped, double curved, sapphire crystal, which virtually makes the entire face of this timepiece scratch resistant. Crafted with bright luminous dials for effortless night-time viewing, the distinctive elegance of contoured steel, and the robust qualities of tungsten, the Swisstek Tungsten Alarm Chronograph is a very special and unique timepiece that blends elegant sophistication with rugged toughness. This timepiece truly defines the essence of form and function.

Retro-TEK

The Swisstek Retro-TEK movement is as unique as it is visually stunning. The pointer hands on the watch's sub-dials spring back to zero at the end of their respective periods of time measurement.

For perfectionists who use seconds as their primary time reference when calculating elapsed time, the chronograph hands are red-lacquered and thereby ensure unmistakable legibility.
